About Campus Living Villages

Student accommodation is our sole focus and the heart of our business. With years of experience working with over 50 tertiary institutions across the globe, we know just how important a safe, vibrant residential community is to the campus experience. Using this knowledge, we work closely with each of our university partners to provide living and learning environments that enhance the transition to independence. Each Village runs an extensive residential life programme designed to create fun, friendly communities, support academic success and encourage personal growth.

We promise so much more than just a room. With contemporary facilities, 24 hour support and opportunities to live, learn and grow, we make living at a CLV Village an indispensable part of student life.

I moved to SUV from Malaysia and, like any other first year student, was worried about making friends. But all the events, parties, lunches and gatherings soon fixed that! I've lived at other student accommodations before and SUV was by far the best experience of my life. I've loved every bit of my three years here. //

RMIT Village has contributed so much to my time at uni. The events calendar is packed with activities that involve everyone in the Village, no matter where you're from. It's also good to know there's always someone available to help that understands what you're going through as a new student. //
